CyberBahn Federal Solutions, LLC is an 8(a) Certified Woman Owned Small Disadvantaged Business (SDB) providing Information Technology and Management Consulting Services.

ABOUT CYBERBAHN

ABOUT CYBERBAHN FEDERAL SOLUTIONS

CyberBahn is an 8(a) certified Woman Owned Small Disadvantaged Business. We provide end-to-end solutions in application development, consulting and re-engineering across all major technologies. Our work ranges from the automation of simple repeatable business processes to deploying complex workflow automation for large enterprises. We provide clean, formatted and unified data that can be transported from any source to any destination – including internal and external networks or the cloud.

IT SUPPORT, TRAINING AND CONSULTING SERVICES

CyberBahn professionals advise organizations on IT and project management best practices, deliver production-ready technology integrations, and provide custom IT training. Led by the CyberBahn executive management team, our experienced consultants support a range of Professional Services, including.

- Program and Project Management Support Services
- Automated Data Acquisition, Cleansing, Standardization, Transformation, Unification, and Integration Services
- IT/IM Staff Augmentation Services
- IT/IM Training Services
- Website and Web Application Design and Development Services
- Salesforce Application Development and Integration Services

OUR PAST PERFORMANCE

Health and Human Services (HHS), Centers for Medicare and Medicaid Services (CMS).

Veterans Affairs: Veterans Enterprise Management System (VEMS).

Department of Defense/Veterans Affairs: Health Registries framework, Janus Joint Legacy Viewer (JLV), and Janus Application.

CYBERBAHN PROFESSIONAL SERVICES

PROJECT AND PROGRAM LEVEL SUPPORT

CyberBahn IT and consulting services include, but are not limited to:

- **Data Services** – automated acquisition, cleansing, standardization, transformation, unification, and integration of all types of data.
- **Architecture Services** – effective SOA, BPM, MDM, and business optimization architectures that reduce costs and improve quality, consistency, and solution maintainability
- **Implementation Services** – full lifecycle management for effective project operations, monitoring and support
- **Infrastructure and Operations Services** – design, implement, and operate data management infrastructure
- **Management Services** – provide onsite staff to proactively identify, escalate, and resolve data management issues.

STAFF AUGMENTATION

CyberBahn staff augmentation and professional services help customers achieve greater results in less time. We are unique in our ability to combine industry, technology, and ATLAS automated data transformation, unification and integration services. Our combined program management team has demonstrable success and experience in managing projects and programs valued over \$100 million. CyberBahn project managers are highly experienced with PMP and ITIL certifications. They are supported by senior program managers that are committed to helping you achieve your goals.

QUICK START DATA AUTOMATION PROGRAM

CyberBahn takes a hybrid approach to project pilots and consulting. Our highly skilled process automation and data transformation experts will work through an actual solution use case based on your specified requirements and objectives. **Within 5-days, we deliver a functional automated business process solution.** Let us help you:

- Improve time-to-value thru reduced cost and complexity
- Liberate data and maximize data accessibility
- Optimize business processes and improve data quality

DATA MANAGEMENT AND QUALITY SPECIALISTS

CyberBahn specializes in **automated messaging transport and data unification** – including the acquisition, cleansing, standardization, and integration of all types of data. Capabilities and expertise include:

- Inbound data standardization and transformation
- Outbound data extract creation
- Data conversion
- Data model development
- Data merge and entity resolution
- Record data augmentation
- Managed File Transfer
- Semantically-enabled data mapping
- Master Data Management

WEBSITE AND WEB APPLICATION DEVELOPMENT

CyberBahn designs and develops websites and technology solutions that are intuitive, easy to use, and accessible via mobile devices.

Our team is comprised of certified project managers and technology consultants who are experts in human factors, usability testing, information architecture, content design/management, visual design, mobile strategy, responsive design and section 508 compliance. CyberBahn has been a leader in offering mission critical scalable web solutions to its customers, including:

- Department of Veterans Affairs (VA)
- Department of Defense (DoD)
- The Center for Medicare and Medicaid Services (CMS).

SALESFORCE APP DEVELOPMENT & INTEGRATION

CyberBahn has deep expertise in **Salesforce.com application development, system architecture and integrations.** Our in-house team of Force.com analysts, developers, architects and administrators has delivered more than 100 implementations – approaching 10,000 development hours – for technology companies, services firms, and government agencies.

OUR PRODUCT

INTRODUCING CYBERBAHN ATLAS

Our *Automated Transport Layer and Augmentation Service (ATLAS)* service platform brings together data integration, event-driven processes, data streaming and rules-based automation. Benefits include:

- A true **data unification service** that supports a combination of data integration (streaming, aggregation, transformation, and enrichment), analytics, and decisioning.
- A **real-time information exchange** environment.
- **Speed and flexibility.** It enables the right data – to be made available to the right systems – in the right format, creating a data bridge that supports **system-to-system interoperability.**
- Optimized for the **effective validation, transformation, unification and transportation of relevant data** – making it “user ready” for any use case.
- **Universally extensible and scalable** with a library of robust and rapidly deployable data transformation functions.
- A **low total cost of ownership (TCO)** solution that enables organizations to deploy new data intensive applications, while extending the life of legacy systems.

Want to learn how ATLAS can help your organization?
