The Transformation Journey

Agile Adoption Maturity – A2M

Our Agile Adoption Maturity Tool helps companies implement a consistent, in-depth and quantifiable approach to assessing their Agile journey.

- ✓ Download in report ready format that can be easily converted to PDF or inserted into a presentation for Leadership and stakeholder updates.
- ✓ We account for actual metrics and KPIs, more survey data points, qualitative feedback, and cover several frameworks and roles.
- ✓ The surveys can be truly anonymous versus pseudo anonymous.
- ✓ Value Stream Analysis.
- ✓ Scalable across an organization at a much more competitive cost.

A2M Overview (How Are We Different)

- ✓ Custom Agile maturity models based on your organization's context.
- ✓ Re-run the same Agile maturity model as often as you want to generate learnings and correlations across time.
- ✓ Generate deep learnings through our AI and propriety heuristics algorithms for recommended suggestions on how to improve.

Build Your Agile Maturity Model

A2M extends well beyond the technology side, and into HR, Finance, Marketing, Sales, and overall organizational culture, structure, and processes to truly understand where the Agile maturity gaps are.

Value Stream Analysis with A2M

- ✓ A2M analyzes a sequence of activities an organization performs to address a customer's request via A2M Value Stream Workshops(VSW).
- ✓ A2M VSW maps the current flow of information and material, generates an ideal future state, and puts forth a high-level plan to achieve the future state.
